

Revostrap

PRODUCT SHEET

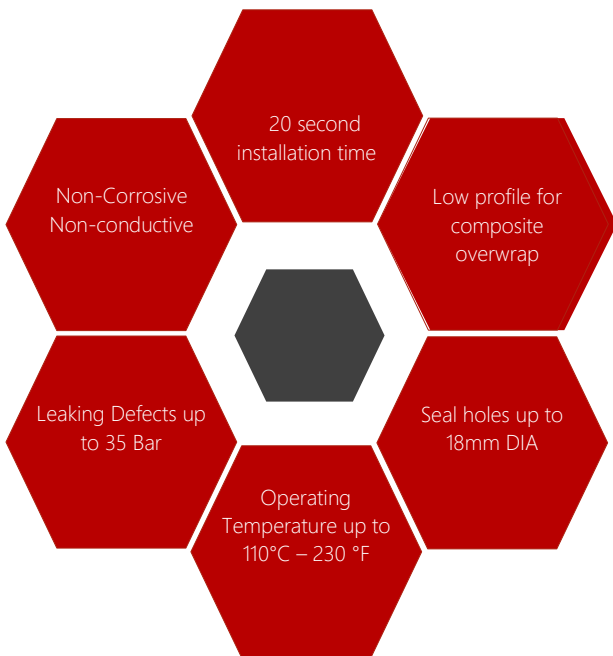

PRODUCT OVERVIEW

REVOSTRAP

The 20 second leak repair system!

Carbontech introduces the Revostrap smart system to our arsenal to combat enduring site complications of leaking defects. It is not an industry secret that no composite repairs can be wrapped over active leaks. Revostrap smart systems is the answer! The Revostrap smart system is lightweight, cost effective and very simple to use, it is the strongest temporary leak sealing strapping device on the market.

RS32 & RS19
REVOSTRAP

Glass Reinforced strapping system
Designed strap around leaking pipes to seal leaks up to 35Bar
Available in 19mm and 32mm widths

RS-R19: 19mm & RS-R32: 32mm
REVOSTRAP RATCHET
Designed to tension the Revostrap until the leak has stopped. Available for the 19 mm and the 32mm Revostrap systems

RS-SA50-19
REVOSTRAP 50 BUNG
Designed for med to high pressure, slightly deformed through wall corrosion or pitted and corroded areas

RS-SA30-19
REVOSTRAP 30 BUNG
Designed for Low pressure, deformed through wall corrosion or heavily pitted and corroded areas

RS-SA80-19
REVOSTRAP 80 BUNG
Designed for high pressure, through wall defects

ADVANTAGES

- Fast, Non-invasive repair - does not require hot work
- Repairs done live – no unplanned downtime
- Low Profile for composite overwrap
- 20 Second leak repair system
- Diver Friendly

INDUSTRIES

- Oil and Gas facilities
- Petrochemical plants
- Chemical plants
- Transmission Pipelines
- Temporary Repairs for

USES

- Pinholes
- Illegal Hot Taps
- Welds defects
- Weld Anomalies

CARBONTECH

The place chemistry, engineering and global expertise are brought together to drive progressive innovation in advanced composite technologies for the emergency repair of critical assets "There is nothing generic about us" we don't just sell pipe wraps; we provide accurate engineering backing to deliver tailored solutions

Sound and responsible engineering is the basis on which we build our company, products and services. It is the core to our success and it is the foundation on which we have engineered and manufactured our innovative and bespoke products

We strive by a zero-failure philosophy and warrant our engineered composite solutions are tested, proven and validated. We vow to provide dependable, responsible and accurate information regarding the capabilities of our systems
